

1-Day Equine Biomechanics Course

Improving Welfare, Soundness & Performance

Sunday 29th September 2019

Centaur HQ, Moreton Morrell, Warwickshire, CV35 9BD

For Saddlers, Physios, Farriers, Therapists, Horses Owners, Vets, Students and Riders

Our previous courses have proved hugely popular. This one day introductory course will combine both theory and practical demonstrations. This course is of interest to anyone who wants to learn more about how their horse works and how to help maintain soundness and improve training.

Topics Covered - Theory and practical's.

- Introduction in to equine biomechanics
- Evaluation of equine locomotion
- Demands on elite and non elite horses - supported by High Speed Footage from London 2012
- Current research in horse and rider interaction

This course will improve your understanding of how horses move and function and provide you with valuable information which you can put in to practice

To Book: www.centaurbiomechanics.co.uk / 07788 978627

Cost £110 (incl course packs and lunch)

Location: Centaur HQ, Moreton Morrell, Warks, CV35 9BB
